Declassified in Part - Sanitized Copy Approved for Release 2012/05/31 : CIA-RDP78-03642A001700020036-2

However, it appears from unitswhich have now commenced their functioning and performance tests, that the design has been perfected so that the completion of the task will become routine.

In a project of this nature, it must be realized that failures may be experienced during tests which may require redesign, although, at present, we do not contemplate any such failures and are relatively sure that with the additional funds, the project may be brought to a successful conclusion.

If the funds are awarded so that we may continue working, we contemplate that the project may be completed in 120 days after receipt of the notice that funds are available.
